This project is located along Highway 83 and is 100% in Walton

County. The project is located in Land Lot 9 and Land District 2.

This project will replace the existing SR 83 bridge over Polecat Creek in Walton County. The existing bridge is 81 feet long and was built in 1949. The proposed bridge will be 120 feet long and will be constructed on the existing alignment. The bridge will be closed and traffic will be directed to an offsite detour during construction. The proposed typical section for the roadway is two 12-foot lanes with 10-foot shoulders (4-foot paved). The bridge will have two 12-foot lanes with 8-foot shoulders. Accelerated bridge construction (ABC) will be utilized to reduce the bridge closure time and minimize traffic impacts. Closure time is estimated to be 45 calendar days and total construction time will be approximately 9 months.

Drawings or maps or plats of the proposed project, as approved, are on file and are available for public inspection at the Georgia Department of Transportation:
